

**2024**  
**U.S. CATALOG**

*Our passion from within*

We are saddened by the sudden death in 2022 at the age of **Josep Puig Puig**; co-founder of the company back in 1964 to which he remained linked until his last day. The involvement and the rest of the values that he transmitted in us must be the beacon of our future. Rest in peace.

We start 2024 promoting digitalization in two lines:

- New website that will allow browsing by type of motorcycle, making it easier and more intuitive to find the products. Likewise, B2B receives improvements in design and new functionalities.
- Generate more visual and media content both at the explanatory level of the product and at the social networks level.

Faithful to the technical collaboration in MOTO GP and SUPERBIKES in the HRC (MOTO GP) and KRT (SUPERBIKES) teams, testing new materials, shapes and designs that are already being applied to the products in this new catalogue. From here, we support both teams with all our technology so that they give us a new world crown to add to our record.

In regard to the catalog that you have in hand, we wanted to give it a more operational focus for the day-to-day life of the seller; including at the end the application tables by product and motorcycle model.

Highlight the following 2024 novelties that you can find in the catalogue:

- **Handlebar area:** High-Road screens (p. 112), Mirage semi-fairing (p. 114), Brake and clutch lever protector with mirror included (p. 140).
- **Intermediate front area:** Led Lumen Z headlight (p. 260), Balance handlebar end weights (p. 172), Adhere headlight protectors (p. 254).
- **Chassis-engine area:** adjustable brake and gear levers (p. 296), chain tensioners (p. 318), CNC chassis trim plugs (p. 323).
- **Rear area:** Rear seat cowls (p. 286).
- **Wheel area:** Brake disc cooling covers (p. 352).

Another year, we appreciate the trust you place in the brand, a reason that encourages us to continue pushing to keep this catalog up to date, year after year.

**Workforce:** 3 Workers

**Infrastructures:** 100m<sup>2</sup> - 1 Location

**Main Product:** Touring Fairing

**Technology:** Fiberglass - Manual processes

**Countries where it is sold:** Spain

## 1964

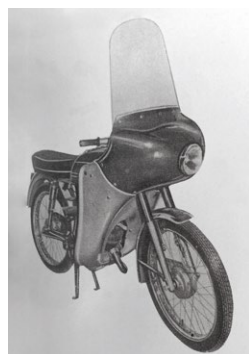

### Company Foundation: "PUIG FAIRINGS"

In the garage of their house in Granollers, Spain, the brothers Josep and Jaume Puig founded the company "Carenados Puig" as a result of their motorcycle passion, only 100m<sup>2</sup> that saw the birth of a dream, making motorcycle fairings.

The two founders were Derbi workers, and they materialized their dreams by turning their passion into their work.

On the left of the image we see Josep Puig, who is in charge of the commercial part of the company, and on the right Jaume Puig, responsible for the technical part and the design of the pieces.

Photographed on a competition Montesa 250cc with Puig fairing and screen in Granollers, very close to where the company's headquarters are currently located.

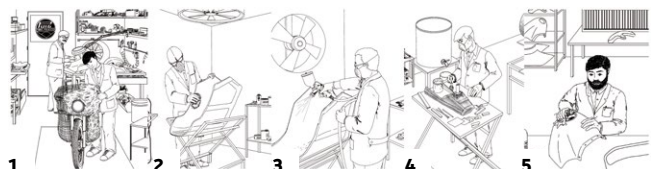

TOURING FAIRING for  
DERBI 49CC

"LEG SHIELD"  
for DERBI 49CC

### PRODUCTION PHASES

## 1967

### New products

TOURING FAIRING for DERBI 49CC

"LEG SHIELD" for DERBI 49CC

### PRODUCTION PHASES

1. Design and prototypes
2. Molds
3. Paint the mold with gelcoat
4. Layering of Polyester fiber
5. Demould and polish --- Finished part

## 1980

### EXPANSION OF THE FACILITIES WITH THE NEW SECTION OF POLITÉ SHEET BLOW MOLDING AND LAMINATING

A new blow molding section is commissioned to serve the Puch of Gijón brand and the sheet extrusion machine is used to produce the thermoformed semi-fairings and windshields for the Derbi and Vespa.

EUROPA II FAIRING  
for the Yamaha XJ650

M6 trunk  
made of plastic

Fuel tank for  
Montesa Cross-Enduro

## 1985

### THE RANGE OF PRODUCTS IS EXPANDED

The new blow-moulding machinery allows closed shapes to be created that are empty on the inside, and that in turn be able to manufacture tanks and boxes for transporting objects.

Europa II Fairings are designed and built for the Yamaha XS400 and XJ650. These were the first complete fairings to incorporate aerodynamic protection for the rider's legs, arms and torso, thanks to the wraparound fiber part and the large screen.

## 1996

### NUMERICAL CONTROL INCORPORATION

First 5-Axis robot.

The manufacture of polyester fiber is a very traditional process that does not allow meeting the growing demand and it is decided to promote thermoforming and pressing. More industrial processes to be able to manufacture more standardized parts and meet demand.

The production of fairings in polyester fiber is abandoned, and focuses on the design and manufacture of screens in acrylic material.

1. TG WINDSHIELD
2. CUSTOM SCREEN
3. NAKED WINDSHIELD
4. SEMIFAIRING CITY
5. CARGO BOX FOR MOTORCYCLE MADE OF PLASTIC

## 2000-2004

### THE ORIGINAL REPLICA, TOURING AND DOUBLE BUBBLE SCREEN LINE OF PRODUCTION BEGINS AND MOVE TO A NEW WAREHOUSE

Puig also begins the manufacture of screens for motorcycles with original windshield. Puig screens are designed with small changes compared to the originals, in order to provide more style, protection, aggressiveness....

The design and production section moves to the new headquarters in the Can Castells Industrial area in Canovelles, Spain, the 1000 square meter warehouse is adjacent to the blow molding section.

ORIGINAL REPLICA SCREEN

DOUBLE BUBBLE RACING SCREEN

TOURING SCREEN

## 2009-2023

### WORKING WITH THE BEST TEAMS

Puig strongly commits to being with the best riders and teams, a strategy that rewards the catalan manufacturer by winning several world championships and from which a lot of Know-How is acquired thanks to working with top professionals in the industry.

## 2012

### EXPANSION TO THE USA – PUIG USA Inc

New distribution warehouse.

With the firm desire to open Puig brand to the American and South American markets by offering great service and competitive delivery times, a new headquarters is opened in Orlando (Florida) from where Puig products can be shipped to these markets.

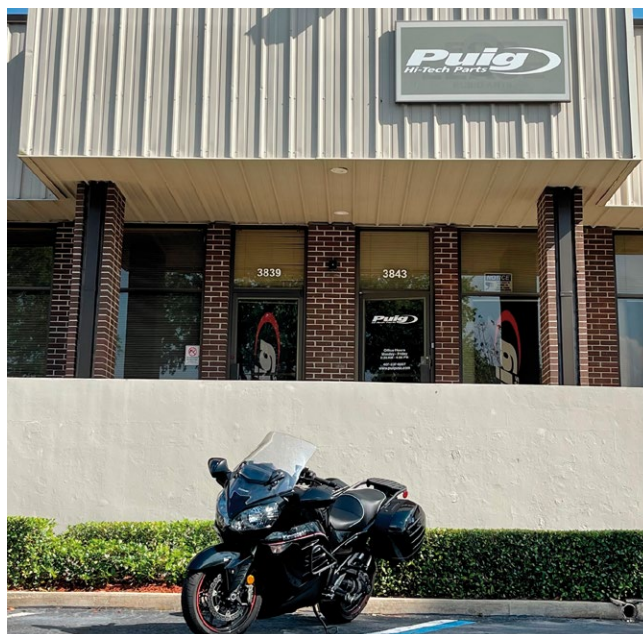

Image of the front view of the Puig USA warehouse in Orlando.

## 2015

### IMPLEMENTATION OF PICKING OPERATIONS

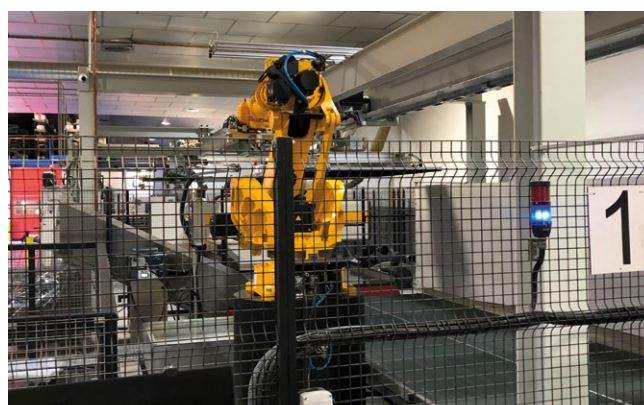

Through automated vertical warehouses.

## 2017

### PRODUCTION LINE AUTOMATION

Incorporation of the latest technology, Nesting1.

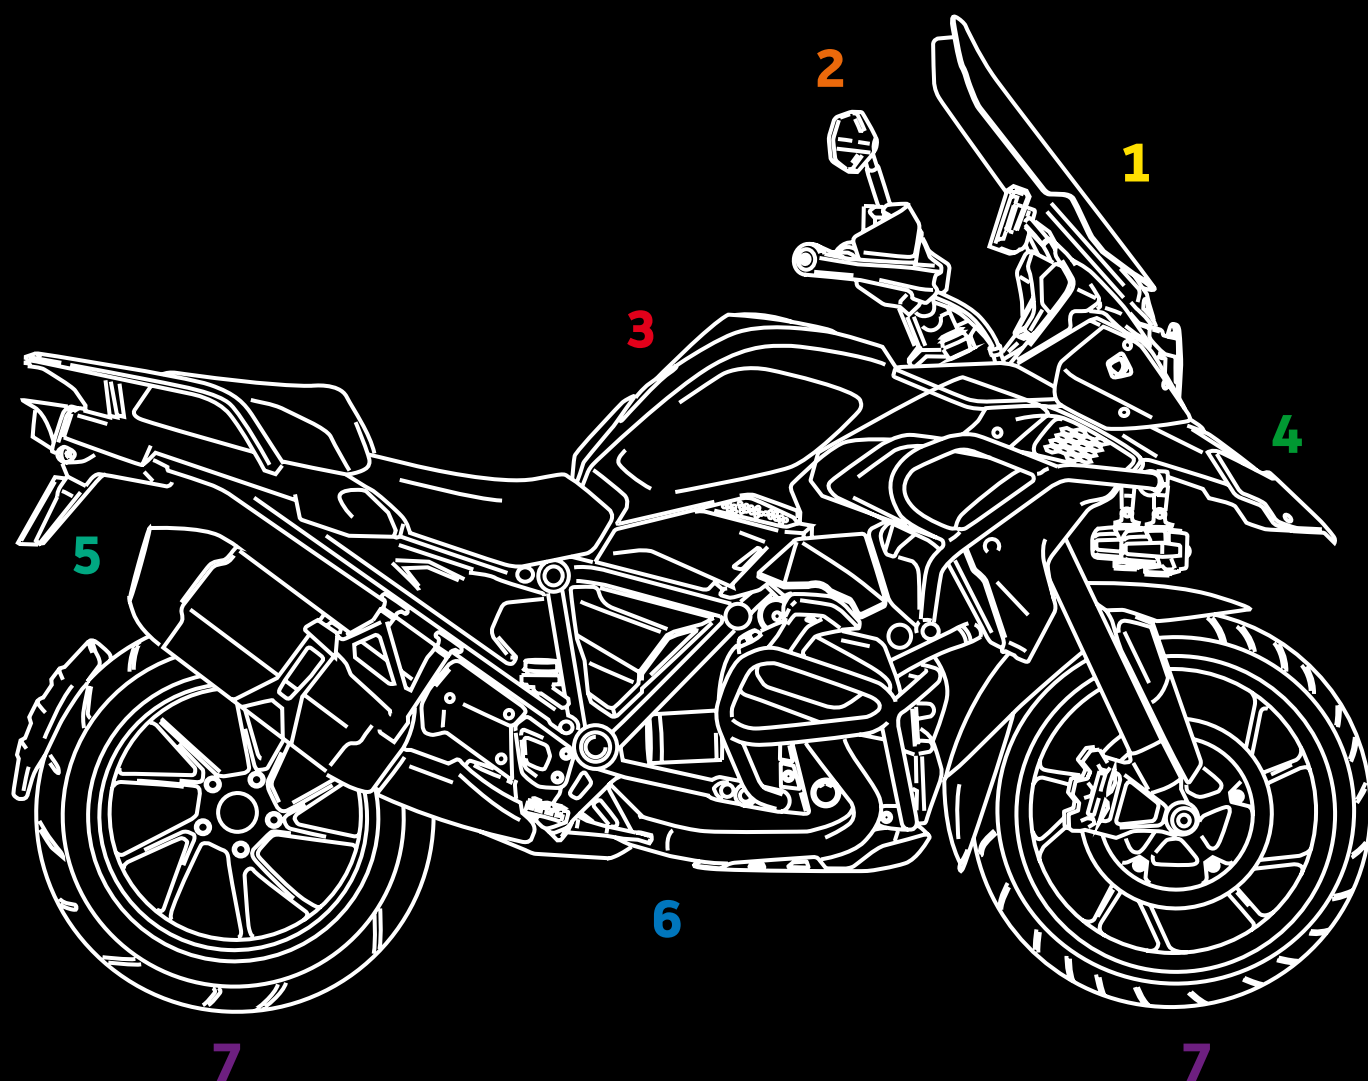

## 2023

### EXPANSION OF THE PRODUCTION LINE

Beginning of the second production line, Nesting2.  
Our packaging is produced in 100% recyclable plastic material.

**100% RECYCLED MATERIAL**

DOWNFORCE

More composure when braking.

STABILITY

More stability when changing direction.

They are made up of two elements:

- Supports injected in flexible black plastic that adapt perfectly to the fairing of your motorcycle by means of a 3M dual lock adhesive, strong, resistant and durable, but that can be removed and does not damage or require holes in your fairing.
- Spoiler in closed form, which is made of 4 mm. acrylic material. To choose a color, following safety regulations, with rounded edges with a radius >2 mm., a highly rigid and light material that is perfect for receiving aerodynamic pressure and directly translating it into downforce.

This product, extracted from the experience of the brand in the Moto GP championship, manages to provide greater air pressure in the front end in high-speed sections and improve cornering.

Aerodynamic test supplied along most of our spoilers.

The new Frontal Spoiler GP is the mix of the most advanced knowledge and technologies in the field of competition motorcycling, and has been designed and manufactured entirely in Barcelona.

Made of 4 mm. ABS, a highly resistant material against impacts, with a matt black finish, it will provide your vehicle with a new aerodynamic plus, in addition to giving it a sport and elegant character according to the aesthetics of your motorcycle.

Mounting it to your motorcycle will be a simple and fast task, without the need for specific mechanical knowledge or tools and without requiring holes for mounting.

Aerodynamic test supplied along most of our spoilers.

Naked spoilers are made up of:

- Spoiler-covers in matt black ABS material, which are easily installed on your motorcycle by means of metal supports with an anti-corrosion finish in black, light and resistant.
- Deflectors, which are made of 4 mm. thick CN acrylic material and a color to choose from (colors defined according to models). These deflectors have a rounded Ø 4 mm. edge for greater rider safety.

The NAKED spoilers are an adaptation of the most cutting-edge innovations in competition in the field of aerodynamics applied to your motorcycle, providing it with the best performance and an incomparable sport style. Designed and manufactured in Barcelona with the most advanced technologies to achieve a technical product with the best aesthetics and finishes.

Aerodynamic test supplied along most of our spoilers.

## Z-RACING WINDSCREEN

PART# 20541H

Aerodynamic test delivered with almost all our screens.

The Z-Racing windscreen reaches the perfect equilibrium between a sportive design and an increase on aerodynamic protection for the rider.

Higher than the oem, its studied shapes include edges to divert the airflow to the sides, avoiding the impact on the helmet and superior part of the riders torso.

Manufactured in 3 mm. high-impact acrylic assuring excellent durability and a perfect optical vision. The edges are 2 mm. rounded to comply with the german TÜV regulation.

Available in a wide color selection.

**NOTE:** To replace or change the screws of the windscreen, please check page 56.

## TOURING WINDSHIELD

PART# 21393H

Aerodynamic test delivered with almost all our screens.

The Touring windshield is the ideal accessory for riders searching to increase the aerodynamic protection without compromising the field of vision.

Its modern style perfectly adapts to the design of the Adventure bikes. Moreover, it is available in clear, light smoke, dark smoke and black for a better personalization.

Developed through our virtual wind tunnel, it is designed with a V shape to divert the airflow through the sides in a clean way, without turbulences and annoying noises, avoiding the impact to the helmet and superior part of the torso.

Manufactured in 4 mm. high-impact acrylic assuring excellent durability and a perfect optical vision. The edges are 2 mm. rounded to comply with the german TÜV regulation.

If you are searching for more protection, Puig offers multi-adjustable visors which can be mounted on oem or our windshields. Please check our catalog on **page 66-75** or our site **www.puigusa.com** to see the recommended visor for your motorcycle.

**NOTE:** To replace or change the screws of the windscreen, **please check page 56.**

## ADJUSTABLE WINDSCREEN

PART# 3179H

Aerodynamic test delivered with almost all our screens.

Thanks to the incorporation of an adjustable mechanism, the height of the screen can be raised quickly and easily, immediately adapting to the needs of each situation and type of ride like off road, city, highway...

Larger than the original screen, this versatile screen has been designed and developed with wind tunnel technology, which diverts the air to the sides cleanly without turbulence and annoying noise, preventing it from impacting the head and the rider's upper torso. This will improve the rider's riding comfort and reduce fatigue.

Made of high impact methacrylate, it offers excellent strength and transparency. It has rounded edges for greater rider safety. Available in several shades to better match your motorcycle.

**NOTE:** To replace or change the screws of the windscreen, please check page 56.

## REINFORCEMENT SUPPORT

The reinforcement support designed by Puig provides extraordinary rigidity to the windshield assembly. Once assembled and unlike other systems, it is not necessary to loosen the nut to move the screen.

This mechanism is designed so that it works in any position of the screen and without any adjustment.

## SEMIFAIRING RALLY

The Rally semifairing is a complement for your off-road motorcycle that will allow you to:

- Improve aerodynamics thanks to the polycarbonate screen that redirects the air, improving the rider's protection.
- Improve lighting thanks to two LED headlights if we compare them to the originals of the motorcycle.
- Install the navigation system that best suits your needs, such as a Roadbook, Mobile Phone or a GPS and adjust it to the position you want, resisting the bumps and jumps that may occur when on the road. It should also be noted that your navigation system will be 100% protected by the screen from possible impacts, stones, dust...

PART# 20548W

The semifairings are served with an adhesive kit that uses the same aesthetic and colors as the motorcycle.

| BRAND     | MODEL      | YEAR      | PART# | W        |

## TECHNICAL SECTION

## M.E.M. (MANUAL ELEVATION MECHANISM)

HIGHEST POSITION

LOWEST POSITION

Compact mechanism that allows you to modify the position of the screen of your motorcycle without tools so you can adapt to the different situations that the route demands, raising it and increasing the aerodynamic protection on fast roads or adverse weather conditions, or reducing it in city or offroad driving for a wide field of view without interference, or for a more sport look.

You will be able to activate the mechanism and place the screen in the position you want with a quick and easy twist on the fixings, and fix it again with just your hands, without the need for tools. The mechanism is used for your OEM screen or for Puig screens for your motorcycle.

Aerodynamic test delivered with almost all our screens.

Part made of ABS (matt black) plastic that will protect you from any impacts that the motorcycle's control panel may suffer. In addition, it will allow us to hide and protect the wiring, giving our frame a cleaner look. The installation of the casing is very simple and comes with precise instructions for correct mounting.

PART# 7515

J Matt black

## HIGH-ROAD SCREEN

PART# 21236W

PART# 21340N

Designed to offer better aerodynamic protection to Custom and Cruiser style motorcycles that have the original front fairing. With elegant and sober shapes, it adapts perfectly to the attractive aesthetics of this type of motorcycle.

Two versions are available, Sport and Touring, with 223 mm. and 323 mm. height respectively, so that each user can choose the one that best suits their riding needs.

Thanks to its design study developed with wind tunnel technology, the High-Road screens are more incline to bring them closer to the driver, cleanly diverting the frontal air stream that would impact the rider directly, eliminating annoying turbulence and vibrations on the helmet. It will significantly increase riding comfort and reduce fatigue to enjoy longer rides.

**NOTE:** To replace or change the screws of the windscreen, **please check page 56.**

## MIRAGE SEMI-FAIRINGS

**NEW!**

PART# 21331F

The semifairing Mirage is composed by a black plastic fairing of different sizes and a screen manufactured in clear or smoked PMMA. The user can choose between two different measures: Sport, for those who look for a more sporty look to their motorcycle, and touring for those who prioritize riding protection. The fairing must be installed by the rider with the screw kit.

## BRAKE / CLUTCH LEVER PROTECTOR WITH MIRROR PRO

The ideal complement for the lever handle protector, with an elegant and minimalist style. Machined from a block of aluminum and anodized finish. Once the ideal position has been established to protect the handle, the mirror can be adjusted manually without the need for any tool.

Only the end of the lever protection can be obtained in different colors. All other components remain black anodized.

NOTE: Universal models for handlebars diameters between 13-18 mm.

## BRAKE / CLUTCH LEVER PROTECTOR

The brake lever protector arises from the need to avoid accidental contact with other riders, avoiding the activation of the brakes and the consequent fall. In the design, Puig has prioritized protection and the integration of the protector into the set. For this, a bidirectional adjustment system of the protector, longitudinal and perpendicular to the fist, has been made.

|--------------------|------------|-------|---------|
| CORE GRIPS BY PAIR | 121 mm.    | 20796 | \$24.59 |

\* Not suitable with the electronic system ride by wire.  
\* Not suitable with oem heated grips.  
\* Not suitable for bikes where the grips cannot be separated from the gas cane.  
\* **IMPORTANT:** Due to the wide variety of original grips, some motorcycles may need to lower the edges of the gas throttle and the use of glue (such as Fischer MS Express) for a correct fixation.  
In motorcycle models where it is not possible to separate the rubber grip from the gas cane because they are one piece, it is not possible to install the grips.

## REARVIEW MIRROR CAPS

The bikers who are most proud of their machines take care of them down to the last detail. The smallest elements can make all the difference. The Puig mirror covers will achieve a clean and well-finished image in case the mirrors are removed to enter the circuit.

**HANDGUARDS**

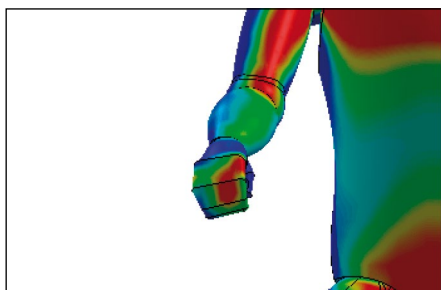

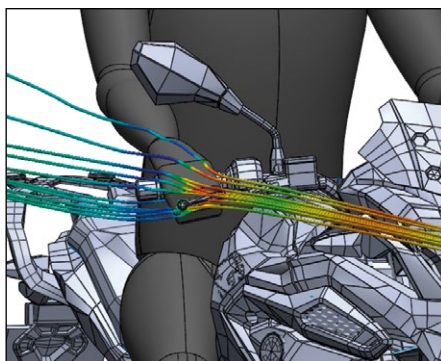

## MOTORCYCLE HANDGUARDS

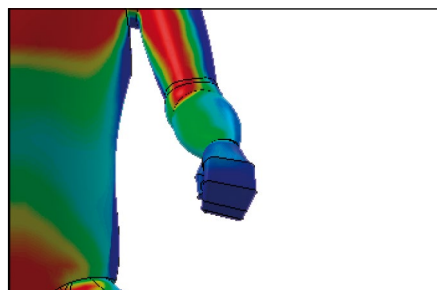

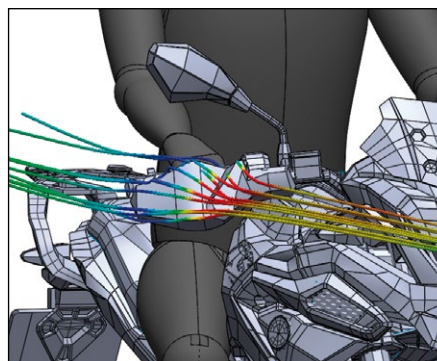

PART# 20509J

OEM

PUIG

Puig offers a wide range of handguards for those motorcycles that do not have them. Manufactured in a matt black plastic material. They are light, durable and matching your motorcycle lines.

Designed with the best aerodynamic software to protect your hands and arms from the rain, air and possible small impacts from small rocks or insects.

Adhesive kit is served for certain models of handguards. For some motorcycle models we have a Sport model.

## MOTORCYCLE HANDGUARD EXTENSIONS

## MOTORCYCLE HANDGUARD EXTENSIONS

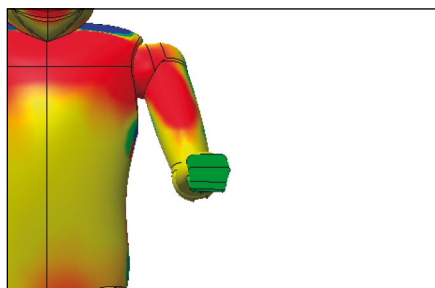

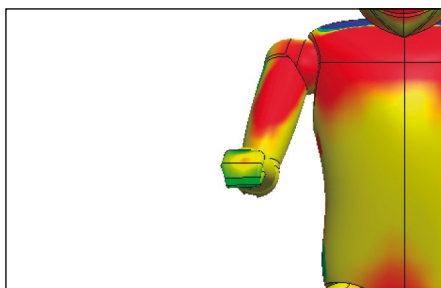

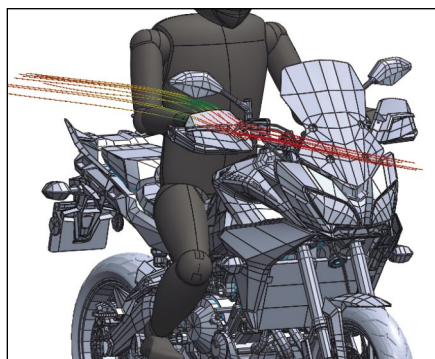

PART# 20378W

OEM

PUIG

The Puig handguard extension is a product destined to the client that looks for maximum protection or that suffers from the impact of the wind on his arms and shoulders.

These small and discrete parts have been specially designed through a comprehensive aerodynamic study to redirect air flow, water or small impacts to your upper arms and thus offering the best riding comfort.

## MAXISCOOTER HANDGUARDS

PART# 8111W

OEM

PUIG

Puig offers a line of handguards for Scooters and Maxiscoters. They are fabricated in very durable material, they are light and made with soft and discrete lines that will match your motorcycle perfectly.

Designed with the best aerodynamic software to protect your hands and arms from the rain, air and possible small impacts from small rocks or insects.

Available in three shades, smoke, dark smoke and transparent.

## HANDLEBAR DEFLECTORS

Exclusive product for BMW models that allow the direct impact of the air to be diverted on the rider's torso while riding, reducing fatigue and giving the motorcycle a new aerodynamic line. In addition, they protect sensitive parts of the motorcyclist such as the shoulders.

☒ **F** Dark Smoke

## BEAK EXTENDER

Thanks to its manufacture in ABS (matt black), a plastic material highly resistant to impacts, this beak extender will perfectly protect the front of the motorcycle.

It is a piece that is easy to assemble, since it does not require drilling holes in the front fender.

## RADIATOR SIDE PANELS

Give a sporty touch to your motorcycle and protect yourself from possible inclement weather with the Puig radiator covers. Made of ABS, a highly impact resistant material, it protects one of the most sensitive areas of your vehicle.

**RADIATOR COVER**

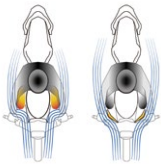

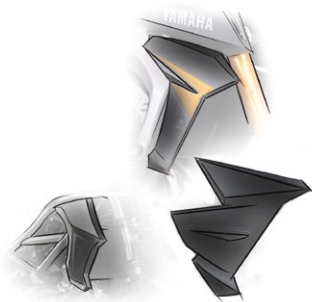

RADIATOR SIDE PANELS

PART# 8564C

They cover the radiator's side edges and provide a continuous air flow around the rider's legs.

PROTECTION

Protects the rider from inclement weather.

\* Check that the mounting of the auxiliary lights does not interfere with the frame of the motorcycle

## HI-BEAM AUXILIARY LIGHTS

### TECHNICAL CHARACTERISTICS:

**Low consumption:** 40w (20w per light)

**Voltage:** DC 12-24v

**Lumens:** 4000L M(2000LM/light)

**Material:** PC Lenses / Aluminum housing

**AUXILIARY LIGHTS**

HI-BEAM AUXILIARY LIGHTS

HOMOLOGATED

Universal fog lights and aluminium case painted black.

LED technology with low power consumption, avoiding putting the battery in danger due to excessive consumption.

Supplied with instructions on our engine guards. Fit engine guards between 23 and 25 mm. diameter.

Equipped with a fuse and cables to connect directly to your battery and with a water proof switch to be installed on your handlebars.

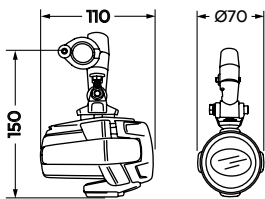

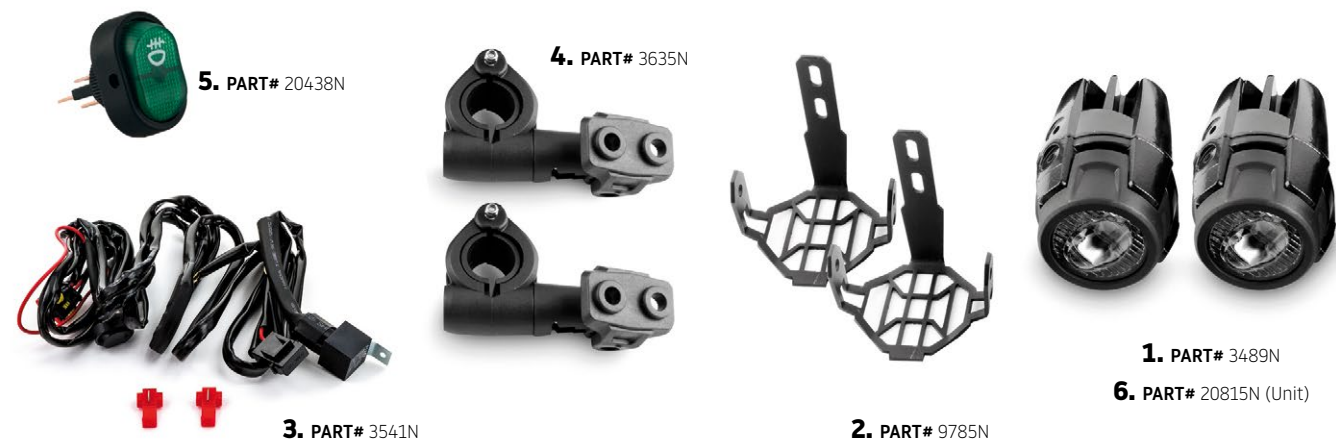

Aluminum housing designed to promote heat dissipation.

Optional metallic grill protections for offroad use.

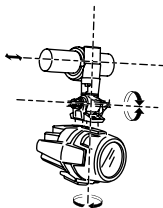

Sells separately (Part# 9785N)

**MOUNTING:**

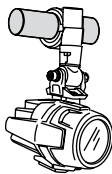

To mount the auxiliary lights on the Puig engine guards use only one of the two spacers that carries the support and the allen screw M6 x 50.

DIMENSIONS

ADJUSTABLE

ADAPTABLE

Adjustable to 25 mm diameter tube.

## TURN SIGNAL COVERS

By replacing the standard turn signals with universal ones, on certain models there is a space left in the fairing that does not affect the functionality or the rigidity of the fixing but which, when stationary, can condition the aesthetic result of the motorcycle customization work. To resolve this, Puig offers a wide range of references for this cover.

TURN SIGNALS

## RESISTOR SET FOR LEDS TURN SIGNALS AND FLASHER RELAYS

### TECHNICAL INFO TURN SIGNALS CONNECTIONS:

Most of the bikes use bi-metallic relays. Its frequency (which is the one that sets the pace of the turn signals) depend on the amperage circulating through the circuit. When replacing the turn signals from OEM to aftermarket ones which carry a difference power, consequently they vary the amperage circulation through the circuit that causes a change on the frequency of the turn signals rhythm. If otherwise, the motorcycle uses electronic relay (which frequency works independently from the amperage circulating through the circuit) the change of turn signals from OEM to aftermarket, should not affect the frequency of the turn signals rhythm.

- **Note:** In case of doubt of what type of relay the motorcycle uses, we recommend to check the turn signal rhythm after switching from OEM to aftermarket.

If the OEM turn signals are replaced by aftermarket ones that use incandescent bulbs, we need to check they use the same power.

In case it is different, we need to replace the turn signals bulbs for others that use the same power as OEM ones. On our catalog, we have available bulbs of different power.

If the OEM turn signals are replaced by LED ones (of much less power than incandescent bulbs), we have two options to balance the frequency of rhythm:

1. Incorporate a parallel relay in the right circuit and the other on the left circuit. If we replace four turn signals, we need to use a resistance **Part# 42980**.

If otherwise, only two turn signals are replaced (one on each side), we need to use a resistance **Part# 58730**.

The resistances are supplied with a scheme for a parallel connection.

- **Note:** On most of the bikes, the warning function of the bike is disabled if the resistance is used.

2. Identify the intermittent relay of the motorcycle (location and number of pins) and replace it for its corresponding from the list supplied on most of the bikes, the warning functions work correctly when the relay is replaced.

- **Note:** we can find some motorcycles in the market that do not have an intermittent relay, obviously in this case it cannot be replaced. Moreover, if on the blinking function intervenes more than one relay, it is possible that replacing only one relay does not solve the problem.

- **Note:** some LED turn signals flash faster than normal when connected to power (it is normal to check the polarity of the cables with the flashing function activated). To verify the actual flashing frequency, remove all power by turning the key to the "off" position and then move to the "on" position to activate the flashing function.

| MODEL   | PART# | NOT     |
|---|-------|---------|
| RESISTORS SET OF 3.9Ω 25w FOR LEDS TURN SIGNALS   | 42980 | \$19.08 |

**REAR SEAT COWLS**

REAR SEAT COWLS

NEW!

PART# 20705C

Made to convert the motorcycle into a single-seater while providing a personalized and sporty aesthetic similar to competition motorcycles. It includes internal pipes that, in addition to lightening the assembly, help to reduce the turbulence generated by the air.

LICENSE SUPPORTS

The license support is not designed to mount the oem turn signals.  
Oem connectors are not delivered to connect lighting license.

PART# 9353N

1.

KIT

It is supplied with light and reflector, both homologated. According to models.

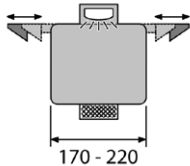

ADJUSTABLE

Fixed or adjustable on inclination.

TURN SIGNALS

Adjustable lodge for turn signals.

UNIVERSAL

Most suitable for license plates.

**ENGINE GUARD**

## ENGINE GUARDS

PART# 21192

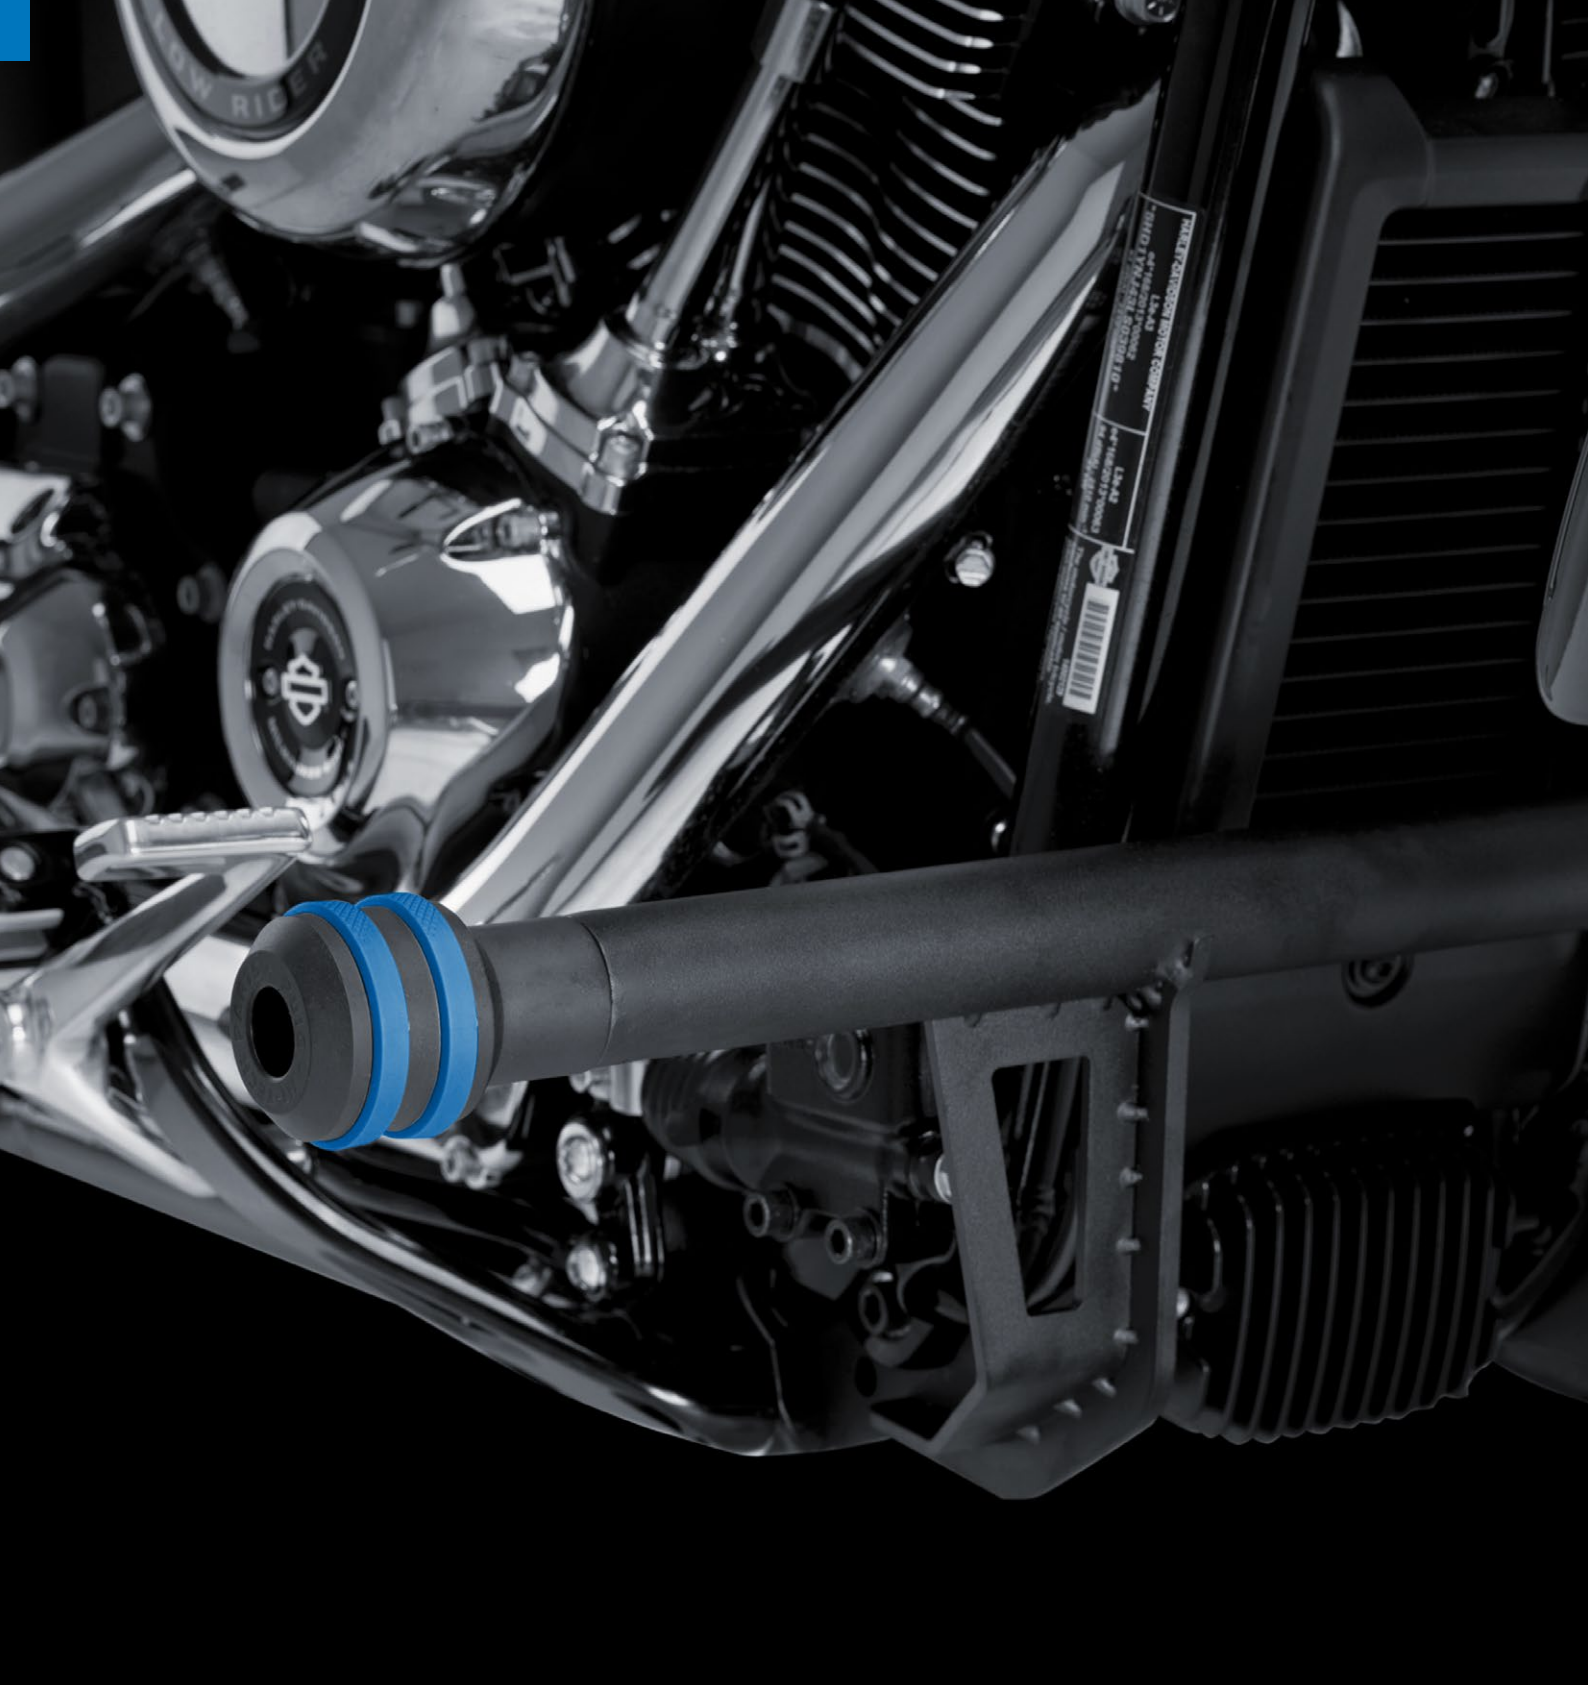

Our Beam and Beam 2.0 auxiliary headlights can be mounted on the R19 frame slider.

Made of steel using high quality machining and precision welds for a perfect fit.

Perfect complement for Trail or Naked type motorcycles, in which the absence of a fairing makes them especially vulnerable to blows in the event of a fall. Improvement in safety and rigidity, in addition to receiving an aesthetic complement that reinforces its image and gives a greater sensation of robustness.

## BRAKE COOLERS

AERODYNAMIC

■ N Black

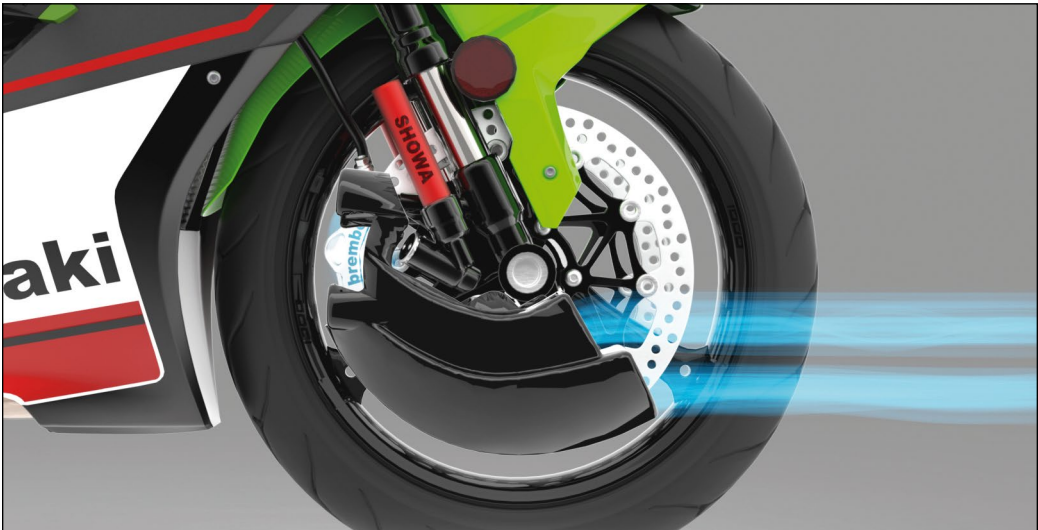

\* Check availability for motorcycle models at [www.puigusa.com](http://www.puigusa.com) typing in the searching window:

**BRAKE COOLER**

BRAKE COOLERS

NEW!

Our brake cooler offers greater air channeling by having a larger intake mouth than the competition. Totally different aesthetic. At the same time, it improves aerodynamics by converting part of the front wheel into a lenticular one. Contrasted effectiveness.

#### **RETURN PROCEDURES**

- No return will be accepted after 30 days from shipping note.
- The return must be accepted from Puig USA, after verification of the material by an agent in the area or, otherwise, through an email sent to **returns@puigusa.com** requesting the return along with detailed images.
- If the return is not Puig USA fault, 15% devaluation will be applied and material will need to be sent paid for.
- If the return is because of the transport, the customer will need to send us the transporter's shipping note where should be noted, at the time of the reception of the cartons, the disagreement of the condition of the material. Additionally, images of the cartons in bad condition will need to be sent to us.

#### **BRAND AND IMAGES**

PUIG® is a registered brand.

The images from this catalog and site **www.puigusa.com** are property of Puig USA and need authorization from Puig USA for its use.

Puig USA does not have any link with brands HONDA, YAMAHA, SUZUKI, KAWASAKI, APRILIA, BMW, BUELL, CAGIVA, DERBI, DUCATI, HYOSUNG, PEUGEOT, TRIUMPH and others mentioned.

All products registered brand, model or initials, are named with only purpose to cross part# with accessories of our own production.
