

## PULLBACK RISERS

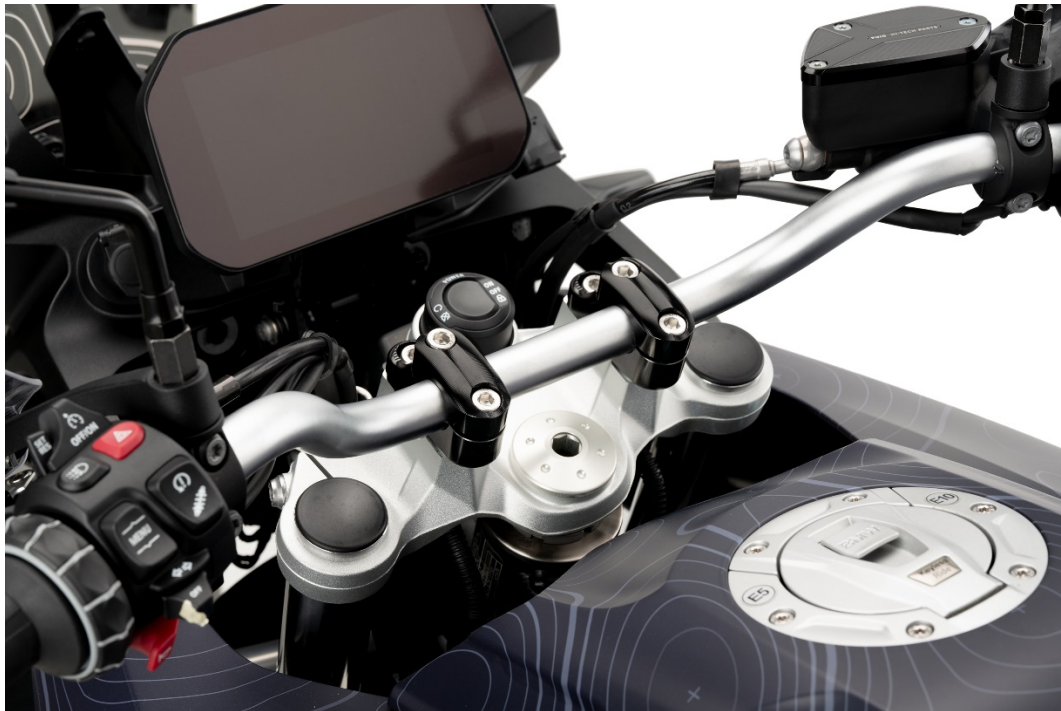

**Raise and bring the handlebars closer, improving riding ergonomics, with the universal Pullback risers.**

With the Pullback riser kit, the height of the handlebar is raised by 25mm while moving it closer to the rider by 16mm. In this way, riding ergonomics is improved, improving both comfort and mobility and reducing fatigue. Ideal for those riders looking for a more relaxed and personalized riding position according to their height.

Its slim and elegant design gives personality to a piece with attractive aesthetics that is always visible. Being made up of two complete semi-flanges, they present a perfect finish as the original upper flange of the motorcycle is not used. They are suitable for installation on the vast majority of motorcycles on the market.

The Pullback riser are made of high quality machined aluminum with subsequent anodizing in black or silver for a better finish, resulting in resistance and lightness.

Available in two universal models for handlebars with a diameter of 22mm and diameters of 29mm, plus specific models (BMW models with off-center half-clamp joining area).

## HI-TECH V REAR-VIEW MIRROR

**Approved rearview mirror with a compact design that can be installed both on the top and bottom of the handlebar.**

The evolution of the Hi-Tech IV model has been developed to achieve an approved mirror without giving up an attractive compact and sporty design.

It can be installed both at the top and at the bottom of the end of the handlebar, making it ideal for owners of Cafe Racer or naked style motorcycles who want to achieve a more personalized and sporty look. It is a universal accessory with availability of specific adapters depending on the motorcycle model.

In addition to improving the aesthetics of the motorcycle, its installation also optimizes vision, increasing our safety, since its anti-reflective convex mirror with magnifying effect provides increased and clear vision in any circumstance. It can be adjusted by hand to facilitate quick and easy adjustment and repositioning of the mirror.

It is manufactured from a single block of high quality aluminum, resulting in a light and resistant piece, with an anodized finish in black or silver, to obtain a perfect finish and be able to choose the one that best suits the aesthetics of your motorcycle.

## **BOND REARVIEW MIRROR**

**Compact rearview mirror for those looking for a sporty and personalized style for their motorcycle.**

The Bond mirror is installed in the upper part of the end of the handlebar, combining perfectly with naked and neoclassical models that are intended to be given a more sporty and personalized Cafe Racer style. It is a universal accessory with availability of specific adapters depending on the motorcycle model.

With an aerodynamic and minimalist design, to improve its integration into the handlebars, 20% of the rearview mirror is located towards the inside of it. It has an anti-reflective convex mirror to improve the pilot's vision and increase safety. It can be adjusted by hand to facilitate quick and easy adjustment and repositioning of the mirror.

It is manufactured from a single block of high quality aluminum, resulting in a light and resistant piece, with an anodized finish in black or silver, to obtain a perfect finish and be able to choose the one that best suits the aesthetics of your motorcycle.

Product not approved due to the dimensions of the mirror.

## REARVIEW MIRROR THREAD COVER PLUGS

**Personalize and give a distinctive touch to your motorcycle with the mirror caps installed on the handlebars.**

Its function is decorative: to cover the threaded holes of the motorcycle's original mirrors when mirrors are installed at the ends of the handlebars. In this way, the aesthetics of the motorcycle are improved and a more personalized look is achieved.

They are made of high quality aluminum with subsequent anodized treatment and knurled surface to achieve a better finish. Available in different colors to choose the one that best matches your motorcycle, they incorporate the Puig Hi-Tech Parts inscription on the outside.

They are suitable for the different thread configurations that most motorcycles use: M10/125 - M10/150-M8/125, both for right and left threads.

## **BEAM 3.0 AUXILIARY HEADLIGHTS**

**Improve lighting during night rides and in adverse conditions with the Beam 3.0 auxiliary headlights with LED technology.**

Intermediate in size and performance between the Hi-Beam and Hi-Beam 2.0 spotlights, they have the same regulation as the Beam 2.0 model. Version 3.0 continues to provide an important extra in lighting since it improves our vision in different circumstances such as night riding , fog, rain, snow and twisty sections.

They incorporate LED technology to combine power and low consumption, they can be installed easily and safely on motorcycle fenders and are adaptable to 25mm diameter tubes. Due to their size they cannot be installed on Puig's R19 frame sliders.

Ideal for trail motorcycles, they have a resistant and light aluminum casing to promote heat dissipation and resist the impact of small objects such as gravel and small stones.

## **REARVIEW MIRROR COVERS WITH TAB TURN SIGNAL**

**Designed for sporty motorcycles that incorporate the turn signal in the rearview mirror and wish to mount the mirrors on the counterweight.**

With an elegant design, this piece is designed for riders with the latest sports motorcycles who have front turn signals in the mirrors as standard and who want to mount the mirrors on the handlebar counterweight. To achieve this, these mirror covers incorporate the compact and multi-purpose approved Tab turn signals.

The covers are made of high quality aluminum with a black anodized finish, resulting in a light, discreet and elegant piece, which together with the Tab turn signal give a personal touch while maintaining the sport essence of R motorcycles such as the Kawasaki ZX10R, Yamaha R1, Honda CBR 1000RR and Ducati Panigale V2 / V4.

## EXHAUST PROTECTOR

**Protect the exhaust pipe in the event of a fall with this discreet and functional accessory.**

This new accessory is very practical since it protects one of the most exposed parts of our motorcycles in the event of a fall and which has a high economic cost, such as the exhaust pipe

Extremely light, it is made with a silicone base, which withstands the high exhaust temperatures and cushions the impact, and polyamide rollers that allow sliding in dynamic falls.

It can be mounted as a clamp around any exhaust pipe, regardless of its shape, as long as the silencer has a development between 170mm and 600mm.

Puig has spare parts for the polyamide rollers to be able to replace them in case of wear caused by abrasion in the event of a fall.

## TAB TURN SIGNALS

**Minimalist design LED turn signals that can be installed in different positions.**

The Tab approved turn signals that can be mounted on the front and rear of the motorcycle, join the extensive catalog of Puig turn signals. With its installation, the aesthetics of the motorcycle are easily and effectively renewed and personalized while, thanks to its LED bulb technology, we achieve optimal visibility to other users.

They stand out for their minimalist design of small dimensions and their great versatility, since they can be installed in different parts of the motorcycle; license plate holder, mirror arm and on the mirror anchor covers of R motorcycles. Being an ideal accessory for all those riders looking for a more sporty and personalized aesthetic for their motorcycle.

## **DART TURN SIGNALS**

### **Stylish LED turn signals with an arrowhead design.**

Small in size, the Dart approved turn signals feature an attractive compact arrowhead shape with black housing and clear lens. Combining design and functionality in equal parts.

They incorporate technology with high-power, low-consumption LED bulbs, providing optimal visibility to other users.

Suitable for front and rear mounting, it is a universal accessory that can be installed on most motorcycles. They include a rubber cap for the bolt that fixes the turn signal, achieving a high quality finish.

## **RUGGED TURN SIGNALS**

### **Sequential turn signals with attractive design with LED technology.**

The Rugged approved turn signals use sequential LED lights, so when we activate them they attract more attention from other riders, improving our safety.

Compact in size, its stylized rectangular shape with black casing and clear lens and careful finish, make it an ideal accessory for all those who want to renew and modernize the aesthetics of their motorcycle.

Suitable for front and rear mounting, it is a universal accessory that can be installed on most motorcycles. They include a rubber cap for the bolt that fixes the turn signal, achieving a high quality finish.

## REARVIEW MIRROR Z3

### **Sports style mirrors with plastic surround casing.**

The new Z3 approved mirrors stand out for their sporty style and affordable price.

The plastic casing, with sporty and aerodynamic lines for optimal air resistance, surrounds the convex, anti-reflective rearview mirror that provides excellent vision.

They are manually adjustable, making it easy and quick to adjust and reposition the mirror. Once positioned, it is firmly fixed, thus avoiding annoying oscillations and vibrations even at high speed.

They can be mounted on most motorcycles on the market with different configurations: fixing to handlebars and fixing to fairing with the variants of straight rod, 30° rod and 70° rod.

## REAR BRAKE FLUID COVER

**Add a personal and elegant touch to your motorcycle with the new rear brake tank fluid covers from Puig.**

At Puig we are aware of the importance of small details, which is why we have developed a new model of cover for the rear brake fluid tank, designed for those models in which the rear cover is visible.

Machined from a block of aluminum and with anodized treatment for an excellent finish, the rear brake fluid reservoir cover provides greater protection to the brake fluid tank while giving a personal and elegant touch to the motorcycle, maintaining the Distinctive design of Puig's Hi-Tech parts.

The base of the piece is served in black and has a grooved band on the side and a ring available in various colors on the front, so you can choose the one that best matches your motorcycle

## RIM STRIPS PERFORMANCE

**Add a sporty, personalized look with the new Performance rim arch stripes.**

Renew the aesthetics of your motorcycle and add a more sporty and personalized look with the new Performance arch stripes for rims.

Made of semi-rigid lenticular PVC to be applied to rims from 14" to 21", they are resistant to UV degradation and small impacts and possible scratches.

The quality of the adhesive on the strips allows them to be repositioned before fixing, making placement easier.

The Performance strips include both the strip for the outer area of the rim and the wider strip for the inner area. And they are available in several colors: blue, red, orange, yellow, green and white, so you can choose the one that best matches the design of your motorcycle.

## CHALLENGE TANK PROTECTOR

**Protect your motorcycle tank from annoying scratches with the Puig Challenge protector.**

Designed to avoid uncomfortable scratches that occur on the lower part of the fuel tank that is in contact with the rider, when rubbing against the belt buckle, buttons or zippers of the jackets.

The Challenge protector is made of resin and has removable adhesive to facilitate its placement, and can be placed on most motorcycles on the market.

Its modern design with aggressive lines adapts perfectly to the aesthetics of sports motorcycles, completely covering the critical contact area but maintaining an attractive sensation of visual lightness. It is available in different colors to obtain a personalized Racing look: Blue, red, orange, grey, green, clear and carbon-look.
